DETAILED ACTION

1. Applicant's Amendment filed 11/07/2005 has been reviewed and placed of record in the file.

Allowable Subject Matter

2. Claims 16-18 (to be renumbered 1-3) are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a method for fabricating a magnetic tunnel junction (MTJ) cell having a narrow dimension at its middle whereat artificial nucleation sites for magnetization switching are formed and having an easy axis of magnetization such that fanning mode of magnetization is produced at opposite edges of the MTJ cell with all limitations as recited in claim 16, comprising forming an MTJ layered stack, the magnetic layers of said stack having a common crystalline anisotropy and common easy axis of magnetization; and patterning within said stack, by photolithography and ion-milling methods, at least one MTJ cell having a narrow dimension at its middle, the dimension being transverse to the direction of the common easy axis of magnetization.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
